

HEDGE TRIMMER ATTACHMENT

What's the perfect accessory to complement your existing TMC line trimmer? The HGC270-22 Articulated Hedge Trimmer Attachment from TMC Power Equipment.

When attached to a compatible TMC line trimmer shaft assembly, the HGC270-22's 62" reach and 22" dual reciprocating blades enable you to trim tall hedges without a ladder, not only saving you time but also allowing you to work much more safely. The HGC270-22 provides a full -90 to +90 degree blade adjustment, allowing you access to not only tall surfaces but also ones that are below your knees and anywhere in between - all with a simple turn of a knob.

Enhancements abound on the HGC270-22. Locking teeth on the case assembly firmly secure the blades at whatever angle

the hedge trimmer is operated. Internal components have been upgraded to provide even greater durability. And the best enhancement? When you are done using the hedge trimmer, the blade assembly folds flat against the shaft assembly, ensuring that the hedge trimmer takes up less space in your truck or trailer while also minimizing damage that may occur during storage and transport.

The HGC270-22 is compatible with a large number of TMC line trimmer models that go back over 20 years. It's easy to turn your old line trimmer that you thought was obsolete into a new time savings tool.

If you are looking to save time, work more safely, and put more money in your pocket, upgrade your

equipment with the HGC270-22 from TMC Power Equipment.

FEATURES & SPECIFICATIONS

GEAR CASE

Lubrication Points	3
Adjustment Angle (Operating)	-90° ~ +90° (180° total)
Adjustment Angle (Storage)	-90° ~ 180° (270° total)

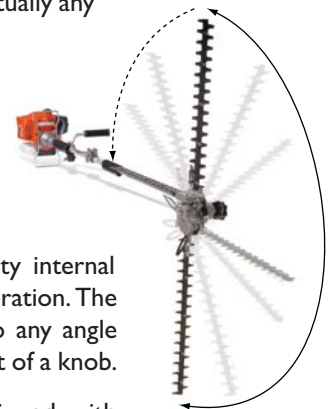

BLADES

Length (in)	22
Type	Double-sided
Cutting Method	Dual-Reciprocating
Teeth	32
Pitch (mm)	30
Effective Cutting Width (in)	21

GENERAL

Dimensions (in)	31.5 (L) x 6 (W) x 4 (H)
Weight (lbs)	5.6

- 62 inches of reach, together with a full 180 degree operating angle adjustment, allow safe and easy access to virtually any cutting surface.
- A fold flat design places the blades against the drive shaft assembly, minimizing the space required during storage and protecting the blades from damage during both storage and transport.
- A heavy duty gear case features heavy duty internal components for fast and reliable blade operation. The blades can be quickly and safely rotated to any angle within its full 180 degrees with a simple twist of a knob.
- Compatible with TMC line trimmers equipped with 7mm splined drive shafts.
- Easy and quick installation onto compatible TMC line trimmers.
