

For those looking for a powerful, yet light weight commercial quality line trimmer, your search is over. The KPW2350V from TMC Power Equipment, featuring a 22.6cc Mitsubishi® two-cycle engine, is the line trimmer you've been seeking.

At the heart of the KPW2350V is the Mitsubishi TLE23 engine. An advanced design allows a true two-cycle engine, with its lower weight, higher speed, and faster acceleration, to still meet today's stringent air quality standards. Additionally, this unique design significantly increases fuel economy, allowing the engine to operate for up to 20% longer per fuel fill ups than previous engines.

The engine incorporates commercial components such as a chrome plated four-bolt cylinder, a dual ringed piston, a forged iron crankshaft, and a heavy-duty foam element. These components ensure that the engine not

only runs cleanly, but also provides you with the performance and durability that you demand.

Not only is the engine made with commercial grade components, the shaft assembly is also constructed with heavy-duty components that are designed to withstand the pounding that only commercial users can exert.

Components such as the solid steel 7mm drive shaft assembly, heavy-duty aluminum housing with supporting bushings, a metal debris shield and engine stand, a heavy-duty gear head, a cast aluminum clutch housing, and a rubber damper at the clutch housing make the KPW2350V the most durable, comfortable, and powerful line trimmer in its class.

So stop looking, your search is over. The KPW2350V from TMC Power Equipment.

FEATURES & SPECIFICATIONS

ENGINE

Displacement (cc):	22.6
Power (net hp):	0.94
Ignition:	Solid state
Carburetor:	Diaphragm w/ purge pump

CLUTCH

Diameter (mm):	56
Type:	Centrifugal

SHAFT

Length (in):	62
Drive Shaft Type:	Solid Steel
Diameter (mm):	7
Debris Guard:	Metal

ERGONOMICS

Handle:	Fully looped plastic
Shoulder Strap:	Optional

EMISSIONS

Air quality compliance:	CARB Tier III/EPA Phase 3
-------------------------	---------------------------

GENERAL

Dimensions (in):	8.9(W) x 10.9(H) x 71(L)
Dry weight (lbs):	12.8

- A powerful 22.6cc Mitsubishi TLE23 engine with a dual ringed piston and a four bolt, chrome plated cylinder provides the performance and durability that professionals demand.
- A heavy duty foam air filtration system keeps dirt and dust out of the engine for long lasting protection. A choke system built into the air cleaner cap allows the engine to be started quickly and easily while at the same time minimizing part counts.
- A solid steel 7mm drive shaft with splined ends, supported by multiple bushings, efficiently and forcefully transfers the engine's power and torque to the work surface with minimal vibration.
- A heavy duty gear case featuring hardened gears and four bearings provides smooth and reliable cutting head operation.
- Extensive use of aluminum and metal, including a cast aluminum clutch housing, an aluminum shaft housing, a metal debris shield and metal engine stand, ensures long lasting durability to keep your line trimmer on the job longer and lower your cost of operation.
- A rubber damper at the clutch housing greatly reduces the transmission of vibrations to the user.
