

Introducing the KPW2700V line trimmer from TMC Power Equipment, Inc. Featuring a 26.3cc Kawasaki® engine, the KPW2700V is the perfect line trimmer for all of your weeding and trimming requirements.

At the heart of the KPW2700V is the 26.3cc Kawasaki engine. Incorporating a dual ringed piston, a chrome plated cylinder, a cast iron crankshaft, and a heavy-duty air filtration system, the engine is designed for long lasting performance and durability.

What sets the KPW2700V apart, however, is not only the engine, but also the remainder of the components used in its design. Unlike other products that are integrating more and more plastic components, the KPW2700V still utilizes metal and aluminum in the highest wear areas to increase its durability. Components such as the metal debris shield, the metal engine stand, the cast aluminum clutch housing, cast aluminum handle mounts and an aluminum handle greatly enhance the durability and reduce the

overall cost of owning and using the KPW2700V. Combining these components with the splined 7mm diameter solid steel drive shaft and the heavy duty gear head, the KPW2700V efficiently and reliably converts the engine power to usable power at the work area. To enhance comfort, the KPW2700V is designed for optimal weight balance and is also equipped with vibration reducing rubber dampers at the clutch housing and the handle mounts.

The KPW2700V is the complete package of power, durability, and comfort for the discerning professional. With its performance and durability features, the KPW2700V represents one of the best values in the industry.

FEATURES & SPECIFICATIONS

ENGINE

Displacement (cc):	26.3
Power (net hp):	1.0
Ignition:	Solid state
Carburetor:	Diaphragm w/ purge pump

CLUTCH

Diameter (mm):	56
Type:	Centrifugal

SHAFT

Length (in):	62
Drive Shaft Type:	Solid Steel
Diameter (mm):	7
Debris Guard:	Metal

ERGONOMICS

Handle:	"U" type with ribbed rubber grip
Shoulder Strap:	Optional

EMISSIONS

Air quality compliance:	CARB Tier II/EPA Phase 2
-------------------------	--------------------------

GENERAL

Dimensions (in):	9.5(W) x 10.5(H) x 68(L)
Dry weight (lbs):	13

- A powerful 26.3cc Kawasaki engine with a dual ringed piston and a four bolt, chrome plated cylinder outputs 1.0hp for quick completion of the most demanding tasks.
- A heavy duty air filtration system keeps dirt and dust out of the engine for long lasting protection.
- A solid steel 7mm drive shaft with splined ends, supported by multiple bushings, efficiently and forcefully transfers the engine's power and torque to the work surface with minimal vibration.
- A heavy duty gear case featuring hardened gears and four bearings provides smooth and reliable cutting head operation.
- Extensive use of aluminum and metal, including a cast aluminum clutch housing, cast aluminum handle mounts, an aluminum shaft housing, aluminum handle, a metal debris shield and metal engine stand, ensures long lasting durability to keep your line trimmer on the job longer and lower your cost of operation.
- Rubber dampers at the clutch housing and handle greatly reduce the transmission of vibrations to the user.
